NAV Canada Rescinds Mandatory Use of COVID Screening Tool

CATCA received confirmation late yesterday evening that NAV Canada has withdrawn their position of making the COVID Screening Tool mandatory for CATCA employees use prior to entering the workplace. The Tool will still be available for anyone that would like to use it by their own choice. NAV Canada will continue to educate employees about COVID and encourage use of the Screening Tool.

In order to maintain a safe and healthy work environment, we remind Members that it is still a requirement to report COVID like symptoms to their manager if experienced at any time.

In Solidarity,

Doug Best
President

Scott Loder
Executive Vice President
